
Alethea Wieland serves as a seasoned clinical affair, regulatory, and corporate strategy advisor. With more than 25 years in drug, medical device, biotechnology, and IT/healthcare analytics companies, her focus today is supporting the life science industry as a functional service provider. Alethea is a subject matter expert in clinical trial operations, regulatory strategy and face to face negotiations with the FDA, corporate compliance, and FDA inspection-readiness.

In 2017, Alethea received recognition for her mentorship and contribution in life sciences by receiving awards from Women in Bio. Alethea volunteers her time judging university pitch competitions and hackathons. She is a proponent of doing the right thing, even when it's not popular or convenient, and teaches business ethics and integrity to countless mentees, students, and peers. As an avid reader, Alethea continues to refine her knowledge on leadership, blockchain, artificial intelligence, technology, and healthcare regulatory reform and policy. She is invited to speak on podcasts and write as a guest author for industry-leading online journals.

She shares a beautiful home, woods, and conifer garden with David and a handful of furry pets located in Wexford, Pennsylvania. Spare hobbies include taking care of wild animal residents, gardening, exercising in North Park, and building one-of-a-kind outdoor heated pet abodes for fun.
