[Kevin Wall](#) brings over 20 years of international experience working with companies to define their pharmaceutical, medical device or combination products and manufacturing processes to move them through to commercialization. His practical approach to science and risk-based decision-making focusses resources on areas that matter most. He is equally effective communicating in the board room and on the shop floor.

Kevin earned a Master of Science in chemistry from Baylor University. His experience defining quality systems for companies includes leadership positions at Johnson and Johnson, Medtronic, Care Fusion, Mentor, and Janssen Pharmaceutical. He has worked with five virtual pharmaceutical companies to move eight of their drug substance and drug product projects through development. Kevin manages both the quality and technical operation aspects of virtual pharmaceutical development. The oversight includes drug product and drug substances. He works with Contract Development and Manufacturing Organizations to develop and execute project plans to time and budget.

Kevin is an avid wine enthusiast and loves to travel, especially when the two go together. He has tasted his way through wine regions across Europe and North America. He is an amateur genealogist who has a passion for his grandchildren and loves explaining their rich heritage to them.
